

Shipping instruction for RMV Plants Germany and RDNL Plant Netherlands

For shipments where

Rheinmetall Military Vehicles GmbH or Rheinmetall Defence Nederland B.V.

is recipient of freight costs the following conditions are mandatory:

Only the following transport companies must be used

- **for transports with gross weight exceeding 30 kgs: DB Schenker**
- **for transports with gross weight under 30 kgs: TNT-Express.**

Our customer ID for TNT-Express reads as follows:

For shipments to the German plants: **73014948**

For shipments to the Netherlands plant (Ede): **133379**

The filling of a collection request at DB Schenker must be made via the "**Shipping Order RMV_RDNL**". This document can be found on our website:

<http://www.rheinmetall-defence.com/rmv/supplier>

This application procedure must only be used for shipments to RMV Germany and RDNL Netherlands and **not** for shipments to our associated companies (e.g. Rheinmetall MAN Military Vehicles Österreich Ges.mbH) or other Rheinmetall companies (such as Rheinmetall Landsysteme GmbH).

For shipments where your company is freight payer, that application procedure may not be used. Of course a transport with DB Schenker or TNT-Express on your terms is admissible. The same applies to returns of complaint orders. Please note that the order reference (order number and position number) has to be handed over to the service company. This information must be printed on the delivery notes.

In case of non-observance of the above requirements we reserve the right to either refuse incurring costs or to balance accounts at the rates we have agreed upon with the service partners.

If you have any questions, please contact your responsible buyer.
